Getting started

Downloading the app

If you have an Apple (iOS) device, you will need to download the app from the Apple App Store. If you have any other mobile device (Android), you will need to download on the Google Play Store. The URL addresses for both app stores are below.

Apple App Store: <https://www.apple.com/uk/app-store/>

Google Play Store: <https://play.google.com/store>

Search 'MySOYL' to find the app, then click 'install' to install the app on your device. Once the app is installed, it will appear as an icon on one of your home screens.

Logging in

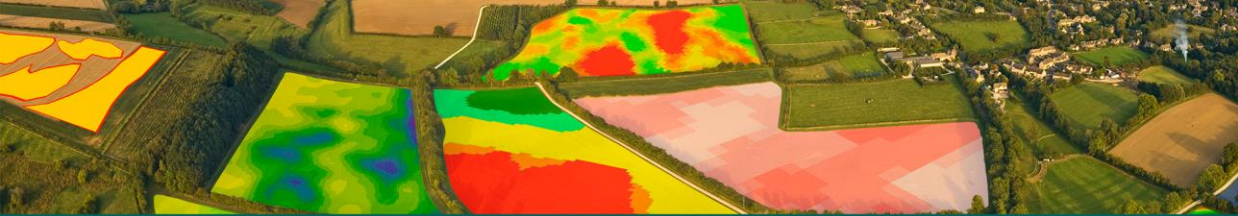

Once you have downloaded the MySOYL mobile app, you will be asked to log in. Your login details are the same as your MyFarm credentials.

The first time you log in, you will be asked to enter a password, but afterwards, you will be able to open the app without signing in again.

General controls

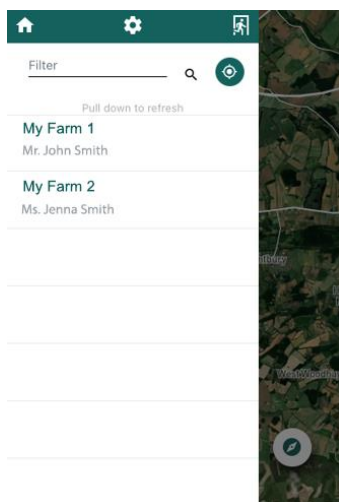

Selecting a business

Clicking the menu item at the top right of your screen will bring up a list of your farm businesses.

You can filter this list by either typing the name of the business you want to view or by clicking the GPS button to reorder the list by which business is closest to your current location.

Click on a business to load its field data.

The navigation panel

The navigation panel has three icons.

Home button

The home button will return you to the map screen.

Cog button

The cog button will take you to app settings

Exit button

The exit button will log you out of the app on the device.

Viewing and selecting fields

Fields tab

The fields tab provides a list of all fields within the selected account. The list can be filtered by typing a name.

Viewing icon

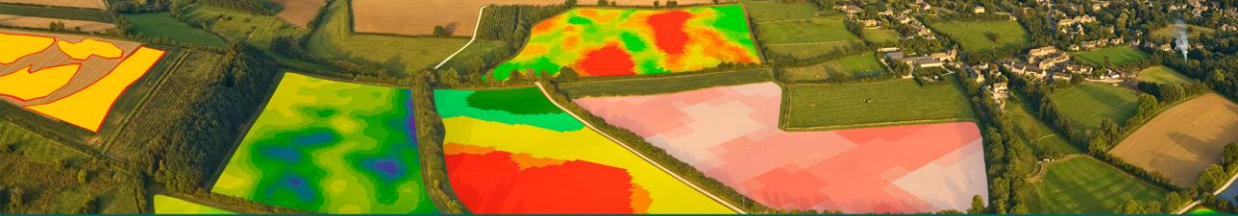

Fields can be made invisible or visible by selecting the viewing icon. Tap a field in the list to be taken to it on the map.

Touchscreen navigation

All map view controls are touchscreen operated in the app. Below is an overview of how to change your map view with touch controls.

Move around the map

Use your finger to pan around the map.

Zoom in/out

Bring your thumb and finger together on the screen to zoom in, and move them apart to zoom out.

Rotate the map

Twist your forefinger and thumb in a circular motion to rotate the map (as if unscrewing a lid).

Adjust map angle

To adjust the angle of the map, hold your forefinger and index fingers together and drag the view up or down.

GPS functionality

When using the app, your location will be marked with a blue dot.

You can navigate to your location in the map view by selecting the compass icon.

Viewing field data

Select a field

Select a field on the map by tapping on it.

View data layers

Tap 'Latest NDVI' to view the most recent NDVI image. To select a different data layer, pull up the menu box. You will see all available data layers to view and will be able to change crop year.

Using the field-scouting features

Project types

Your field-scouting activity is saved in the app by project.

There are two types of project: scouting and environmental. Project type is indicated by the below icons next to the project name.

Scouting

Environmental

Scouting projects can be created and edited in the app. Environmental projects can be viewed within the app but can only be edited in the desktop version.,

Create a project

From the projects tab, select the plus icon.

You can then choose a name for your project.

Select 'Private' if you don't want your project to be visible to anyone else.

w www.soyl.com/mysoylinfo

Select a project

To view a project, select it from the projects list. This can be found by opening the 'Project Layers' tab.

Your selection will be confirmed by a green box appearing next to the name in the list.

Select the arrow to view the list of features within your chosen project.

Project features

The project name can be edited by selecting the pencil icon.

You can delete the whole project or individual features using the bin icons.

If you select a feature, you will be taken to it on the map.

Editing a project

1. Select the existing scouting project you wish to add features to.
2. Tap in the circle that appears next to your selected scouting project.
3. When the orange pencil is displayed you can add and edit features..

Adding features to a project

-  Draws a line.
-  Drops a pin at your GPS location.
-  Draws a polygon.
-  Drops a point at your selected map location.
-  Uses your GPS location to create polygons or lines.
-  Undoes the last action.
-  Deletes the selected features.

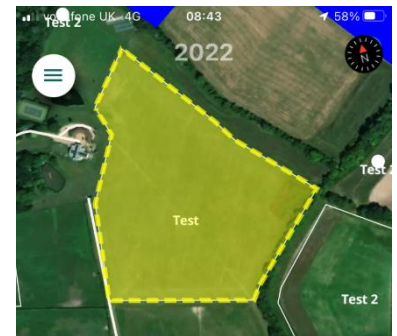

Editing a feature

Select a feature you have added on the map.

The pull-up menu displays information about your feature.

You can choose to:

-  Edit the feature name and type.
-  Alter the shape or location of the feature.
-  Scale the size of the feature.
-  Delete the feature.
